Profile:

SPECS Surface Nano Analysis GmbH as a leading manufacturer produces innovative components and customized systems for surface spectroscopy and microscopy. The customized systems are highly integrated with facilities for sample and thin film preparation and in-situ analysis from UHV to high pressures. Main analysis components are the hemispherical energy analyzer family PHOIBOS, the time-of-flight spectrometer THEMIS, the ultimate stability Aarhus SPM family, the ultimate low temperature SPM family JT-SPM, the Tyto SPM head, the KolibriSensor, the in situ SPM Curlew and the high resolution LEEM/PEEM instrument.

Brands:

PHOIBOS, THEMIS, FOCUS, XR 50, TMM, UVS, UVLS, IQE, IQP, EQ, FG, ErLEED, EBE, PCS-RF, PCS-ECR, MPS-ECR, TGC-H, Aarhus SPM, KolibriSensor, JT-SPM, Tyto, Curlew, FE-LEEM P90

Categories:

- Analytical & Testing Services
- Analytical Instrumentation
- Auger Electron Spectrometers
- Detectors / Multipliers
- Ion / Electron Guns
- Materials Testing
- Microscopy
- Scanning Probe Microscopy Systems
- Sputtering Deposition System
- Thin Film Vacuum Coating
- SNMS/SIMS Instruments
- X-Ray Photoelectron Spectrometers
